## Homework

### Homework Exercises:

- You will make a five-minute presentation in class about your model (You can use the full five minutes of talking and there will be an additional two minutes for questions).

### Notes on Homework:

There will not be time to go into all the details in your presentation, so focus on:

### Structure:

1. Start by describing your research question
2. Briefly describe your model
3. Describe the experiments you performed:
  - What outputs did you observe or measure?
  - What parameters did you change?
  - What did you see? (e.g., behaviorspace graphs or screenshots of the model)
4. Conclusions

### General recommendations:

- 5 slides, one minute each.
- As much as you can, use figures (graphs, illustrations, images, etc.) instead of text.
- Avoid slides with a lot of text

You can't say everything you did, so focus on the most interesting highlights.

You can describe what you did in greater depth in your paper.

## Schedule of Presentations

---

Monday Dec. 2	Wednesday Dec. 4
Ferna Alvarez-Carrascal	Savi Buluwana
Andrew Harder	Maya Maciel-Seidman
Xingyu Huang	Nadya Paschall
Erica Scarpitti	Rayshaun Pettit
Jeremy Tallon	Farzana Rahman
Jiaying Yang	Xiyu Wang
Samuel Yang	Hannah Wolf

---
